Frontend developer/UX challenge DUMA Works

Task: Redesign and implement the DUMA Works profile page
Time to complete: 72 hours
Delivery: Fully functional code and design package emailed to DUMA Works

Goals with this page (in order of priority)

1. Logged in users should see the notifications from DUMA and take action
2. We want to stimulate the user to make the profile as complete as possible
3. We want to stimulate the users to invite other users to their network to get references
4. We want it to always be possible to post a job from any view and the user should notice this functionality

Should contain

- Profile pic
- Personal info
  - Name
  - Birthdate
  - Origin
  - Gender
  - Member since
- Personal description
- Skills
  - Skill name
  - Education level
  - Skill rating (how good am I at this on a fixed scale)
- Ratings and recommendations
  - Recommendations from other users
  - Ratings of skills from other users
- Alerts/notification
  - A way to show alert or notifications from DUMA to the user
- Navigation
- Other information
  - How many connections (to other users)?
  - ID number and a link to a scanned copy of the ID card
  - Link to the user's CV
  - Link to other certificates (like criminal records etc)
- Optional content (up to you to decide)
  - A way to contact DUMA staff
  - A way to find DUMAs social channels

The other views that are available to the user are

- Personal dashboard
- Social network
- Screening tests
- Account settings
